

ClearPaa

ULTRA

Efficient
water
filtration

ClearPaa^{ULTRA} is a state of the art Ultra-Filtration system capable of delivering filtered water of consistent high quality under varying feed conditions with minimal supervision.

ClearPaa^{ULTRA} provides a positive barrier against sub-micron particulate matter, colloidal material and pathogens. It comes pre-commissioned with smart automation to continuously maximize production in line with production requirements, irrespective of feed conditions. Whether used as a stand-alone filtration system, or part of an integrated treatment process, ClearPaa^{ULTRA} offers flexibility and robust reliability for peace of mind.

APPLICATIONS

- > Upgrade of surface or subsurface waters to potable standard
- > Pre-filtration for desalination processes
- > Upgrade of waste water for re-use
- > Production of process water
- > Treated water discharge to sensitive environment
- > Compact, ideal for footprint-constrained applications

TYPICAL CLIENTS

Mining & metal processing operations

Petroleum refining

Chemical manufacturers

Power plant

FMCG production sites

Agri-processing

Commercial & municipal clients

BENEFITS

Superior product water quality

Smart automation for maximum recovery

Small footprint

Modular and simple to install

Minimal site works required

State-of-the-art solution for turbidity, solids and pathogen removal.
